OBJECTIVE

Flutter Full Stack Developer with 1 year of hands-on experience building real-world mobile applications using Flutter, Dart, and Kotlin, backed by Firebase and RESTful APIs. Currently extending into backend development with Node.js, Express.js, and PostgreSQL to build and understand complete, end-to-end solutions. Also skilled in IoT integration and AI-based detection systems. Seeking a junior-level Flutter Full Stack Developer role or internship where I can apply my skills, contribute to meaningful projects, and grow alongside an experienced team.

WORK EXPERIENCE

Flutter Developer Intern (Remote)

24 Jul 2026 – 24 Sep 2026

Internee.pk

- Built Flutter apps including an LMS learning platform and a role-based feedback & review system
- Implemented Firebase Authentication, Firestore real-time streams, and Riverpod state management

Flutter Developer Intern (Remote)

12 Jul 2026 – 12 Aug 2026

Devexo Solutions

- Completed 4 Flutter app tasks remotely: Student Profile App, Notes App, Weather App, and Expense Tracker App
- Built the Expense Tracker as a full stack app with a Node.js, Express.js, and JavaScript backend and a PostgreSQL database
- Used Firebase and REST APIs in the remaining apps

Android Developer Intern

2 Jul 2025 – 17 Aug 2025

The Net Rider Software House

- Built and shipped Android features in Kotlin following MVVM architecture and clean-code practices
- Integrated Firebase Authentication, Firestore, and Cloud Storage into client applications
- Consumed RESTful APIs and managed asynchronous data flows using Kotlin Coroutines
- Collaborated with the dev team through code reviews, sprint planning, and daily stand-ups

Administrative Assistant

2026 | 1 Month

PEEF – Punjab Educational Endowment Fund

- Maintained official records, drafted correspondence, and streamlined documentation
- Supported senior management with scheduling, reporting, and inter-department coordination

FINAL YEAR PROJECT

AI-Powered Fire Prevention and Alert System

2025 – 2026

YOLOv8 · IoT Sensors · Android · Firebase · Video Streaming

- Trained a YOLOv8 model for real-time fire and smoke detection, integrated with IoT sensors for live temperature and gas readings
- Built an Android app for live video streaming that displays real-time sensor data and sends Twilio SMS alerts to emergency contacts

PROJECTS

Notes App — Flutter, Dart, Firebase, Firestore — note-taking app with auth, CRUD notes, and dark mode

Weather Forecasting App — Flutter, Dart, REST API — live weather lookup by city with recent search history

LMS Learning App — Flutter, Firebase, Firestore — course browsing with video lectures and scored quizzes

EDUCATION

Bachelor of Science in Information Technology

2024 – 2026

University of Education, Township Campus, Lahore | Post ADP | Graduated 2026

TECHNICAL SKILLS

Languages	Kotlin, Dart, XML, Python, HTML, CSS, JS
Mobile	Android SDK, Flutter, Jetpack
Backend	Node.js, Express.js, PostgreSQL, Firebase Auth, Firestore, Firebase Storage, REST APIs
AI & IoT	YOLOv8, Object Detection, IoT Sensors, Twilio SMS
Tools	Android Studio, GitHub, VS Code
Soft Skills	Problem Solving, Team Collaboration, Communication

LANGUAGES

Urdu — Native Punjabi — Native Saraiki — Native English — Intermediate
